No Carryout

**Rough Roads, Potholes & Time Take A
Toll On Your Struts and Shocks.**

**Most Don't Realize Shocks and Struts Are a
Critical Safety Component of Your Car.**

By the time you think you need new shocks or struts, it's usually way past the point when they should have been replaced.

Some signs your shocks or struts are due for replacement:

- Does your vehicle bounce excessively when driving on rough roads or after hitting a bump?
- Does the front of your vehicle dip when braking?
- Does the body roll or sway excessively when cornering or driving in crosswinds?
- Does the suspension bottom out when backing out of the driveway or when hauling extra passengers or weight?
- Are your tires wearing unevenly?

If you said yes to any of these chances are your **Struts or Shocks** are due to be replaced.
If you said yes to all of them do NOT wait, it's time NOW!

Still not sure? Stop in or call and our professional technicians will check them for you at no-charge.
